

CONSTRUCTION MANAGEMENT

Itasca Community College- Minnesota State University Moorhead

Did you know that construction is the nation's largest single industry and its largest employer? Opportunities for graduates in construction management continue to grow. The Bureau of Labor Statistics expects the need for construction managers will increase by 47% in the next ten years. In fact, it is estimated that universities with quality construction management programs have placement rates that exceed 90 percent. How many other departments in any university can say that?

What is the Construction Management major at MSUM? The Construction Management curriculum at MSUM will prepare you to enter a challenging and rewarding field. The classes include construction estimating, project scheduling, construction materials and methods, surveying, project management, construction equipment, and safety on the job site. The CM curriculum also includes many business classes areas such as accounting, economics, and management.

The classes within the CM degree at MSUM are continually updated to give you the can chance to work with the industry's most recent developments and best computer software available.

The mission of the Construction Management program is threefold:

- To maintain a nationally accredited construction management program, which will produce graduates who will have the technical, managerial and general knowledge necessary to advance professionally in the construction industry?
- Provide an environment, which encourages students and faculty to engage in professional development, critical thinking, and creative endeavors.
- Promote continuous improvement of teaching, learning and program curriculum.

The ICC courses listed on this guidesheet should be taken within the A.A. degree. MSU strongly encourages Itasca students to complete the A.A. before transferring.
