

## NATURAL RESOURCES-WILDLAND FIREFIGHTING

Itasca Community College

**Award:** Diploma  
**Length:** 32 semester credits

The Wildland Firefighting Program consists of a number of fire classes taught by certified instructors along with some Natural Resource courses. The goal of the program is to provide graduates with the necessary background to become wildland firefighters and also teach some Natural Resource skills which will hopefully help them to find employment during non-fire periods. The current job market for wildland firefighters is excellent, and they are being hired by many natural resource agencies.

<u>Fall Semester</u>				<u>Spring Semester</u>			
Biol	1131	Dendrology	3	ForT	1202	Natural Resources Careers	1
ForT	1108	Intro to Waters	1	ForT	1309	Wildfire Power Saws S-212	2
ForT	1201	Intro to Natural Resources	1	ForT	1310	Pumps & Water S-211	2
